

Arezzo 2020 to change to the left

With Luciano Ralli mayor

Voting will take place on 20 and 21 September 2020 in Arezzo to elect the Mayor and the City Council.

It's an important opportunity for a change in the way of governing Arezzo and to make it a united, industrious, just, beautiful city.

Thinking positively about the future it is necessary to increase solidarity and social cohesion; we do not want to divide citizens between whites and blacks, from Arezzo and foreigners, residents and non residents, young people and old people, but we want to unite them.

Here is a summary of our program.

Government of the city: honesty, transparency, respect for the law, rigor, spirit of service in the absolute public interest

United city: a city of relationships and participation; integration and coexistence between Arezzo and citizens of foreign origin; equal dignity between center, neighborhoods, hamlets; fight against discrimination of all kinds.

Social services: Active contrast of social inequalities, loneliness and poverty; support services for people in difficulty, especially for the elderly, minors, disabled and foreigners; a municipal welfare with all the local energies to guarantee all the same rights; reopening of the House of Cultures.

Health: More prevention, more local health services; quality hospital; care and assistance of chronic diseases; promotion of basic sport as factor of health.

Work: certain rights for all workers; support to the manufacturing sector, to slow and quality tourism, to a short chain agriculture, to neighborhood shops and artisans; stop new shopping centers; ecological conversion for new and good jobs.

School: nursery schools for all children in Arezzo; contrast of early school leaving; making each school safe; University and City united and in synergy.

Environment: waste from waste to resource without increasing incineration; public water without profit; alternative mobility to cars; urban regeneration of degraded areas; hydraulic works against hydrogeological instability.

Culture: common good, not commodity; enhancement of historical and artistic treasures; support for new cultural activities; structures and spaces for youth creativity; opportunities for exchange and integration between the different cultures present in the city.

The good policy is "Arezzo 2020 to change to the left"
